DIMMOCK'S SPECIAL BIBLIOGRAPHY, NO. 3.

THE

WRITINGS OF SAMUEL HUBBARD SCUDDER.

COMPILED AND EDITED BY GEORGE DIMMOCK.

CAMBRIDGE, MASS.:
PUBLISHED BY THE EDITOR.
Aug., 1879.

INTRODUCTORY.

For the third of these Special Bibliographies, I have compiled a list, supposed to be complete to the end of July 1879, of the writings of Mr. Samuel H. Scudder, of Cambridge, Mass. Mr. Scudder has aided me much in the preparation of this list, Mr. S. Henshaw has examined the proofs, and Dr. H. A. Hagen has allowed me the facilities offered by his large entomological library. I here give grateful acknowledgment to them and to others who have rendered assistance.

The titles of the first and second of these Special Bibliographies were printed on title-slips for use in library catalogs. The titles of Mr. Scudder's writings will be printed only in the accompanying form, and can be used on title-slips by cutting and pasting.

The necessity having arisen for a distinct recognition of the kind of notice a paper has received, I suggest the annexed scheme, adopted in the following pages:

1°.	Adversely critical,	indicated by	Crit. Rev.
2°.	Commendatory or doubtful,	"	" Rev.
3°. Neutral.	Mention of title and reference only,	"	" Note.*
	Synopsis, or description of contents,	"	" Notice.
	Tabulated synopsis, etc.,	"	" Abstract.
	A portion reprinted,	"	" Extract.
	Entire reprint,	"	" Reprint.
4°.	Advertisement,	"	" Advert.*

* Rarely noticed in my Special Bibliographies.

True separates, *i. e.* separates paged anew or with any additional matter, such as a new title page or title page cover, are indicated by the word Separate.

The fourth of these Special Bibliographies may not be issued for several years, the editor's other duties preventing him from employing his time in their supervision.

Corrections and additions will be thankfully received by the editor.

GEORGE DIMMOCK.

DIMMOCK'S SPECIAL BIBLIOGRAPHIES.

PUBLISHED IRREGULARLY.

Nos. 1 and 2 are reprinted on title slips, 12.5×5 cm., in a style similar to that adopted by the Committee on Title Slips, appointed by the American Library Association. (See *The Library Journal*, 1878, v. 3, p. 113–115.)

The title slips were printed for the lists of Dr. LeConte's and Dr. Horn's papers, but hereafter the lists will be put on sale only in pamphlet form. Each reference is independent as heretofore, so that by cutting out the references and pasting them on title slips, one can have the advantages afforded by a title-slip system of bibliography.
